

MITHUN P

Full-Stack Developer | AI & Data Science Undergraduate

Erode, Tamil Nadu, India | 8122762374 | mithunmithun71548@gmail.com
linkedin.com/in/mithun-p2006 | mithunp.me | github.com/mithun-p2006

PROFESSIONAL SUMMARY

Full-Stack Developer with a strong Artificial Intelligence and Data Science foundation, focused on building and shipping production-grade web applications end to end. Delivered four live products, including a national-level event management platform processing real registrations and payments, using React.js, Node.js, Express.js, and SQL/Supabase, deployed on Cloudflare and VPS infrastructure. Experienced integrating AI/ML models, REST APIs, and payment gateways into production systems.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, Flask, REST APIs

Databases: PostgreSQL, Supabase, SQL

Cloud & DevOps: Git, GitHub, Cloudflare, VPS Hosting, Vercel, Cashfree Payment API, Networking

Data & AI/ML: Power BI, DAX, Machine Learning, Data Preprocessing, Model Evaluation, Deepfake Detection, Gemini API, Roboflow

PROFESSIONAL EXPERIENCE

Web Development Intern | Gradix Technologies

Mar 2026 – Jun 2026

- Built and shipped live product modules in a full-stack production environment, working across frontend and backend layers of scalable web application features.
- Collaborated with the engineering team on debugging, testing, and deployment pipelines, improving overall product stability and release quality.

AI & Machine Learning Virtual Intern | NSIC

Apr 2025 – Jun 2025

- Completed a 10-week structured program on supervised and unsupervised machine learning workflows, building and evaluating models using data preprocessing and optimization techniques.

KEY PROJECTS

DAKSHAA T26 — Full-Stack Event Management Platform — dakshaa.ksrct.ac.in

- Built a full-stack web application for a national-level technical symposium, handling registrations, participant data, and online transactions for a live event.
- Developed a responsive React.js frontend and Node.js/Express.js REST API backend; integrated Supabase for auth/database and a payment gateway; deployed on Cloudflare (frontend) and VPS (backend).

Time2Order — Preorder Management System — time2orders.com

- Built a web-based preorder and soundbox platform for local shops using Python, SQL, and the Cashfree Payment API, reducing customer wait times and improving crowd-flow management during peak hours.

TrueSight AI — Deepfake Detection System

- Built an AI-powered deepfake detection system with a Flask backend, using Roboflow-trained models for video and audio analysis; designed forensic-style report generation for cybercrime investigations, presented to Namakkal Cyber Cell, winning 2nd Prize for innovation and real-world impact.

Time2Due — Operations Management Platform — time2due.com

- Designed a web platform for cable operators to manage employees, track offline payments, and view reports through mobile-friendly dashboards.

Time2Farm — Farm Finance & Management Platform

- Built a farmer-focused app to track section-wise income, expenses, and profits, with AI-driven insights delivered via the Gemini API, and a mobile-friendly interface for non-technical users.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

Expected Jun 2027

K.S. Rangasamy College of Technology, Tamil Nadu

ACHIEVEMENTS

- 2nd Prize — TrueSight AI Deepfake Detection System, presented to Namakkal Cyber Cell.
- Built and deployed 4 live production products: Time2Order, Time2Due, Time2Farm, and DAKSHAA T26; developed a Steam game platform analytics dashboard in Power BI using DAX.
- Built a QR-based digital attendance system used in live events.
